

Sketch of outline possible plans shown at public meeting 24.10.11.

Dark blue shows existing school buildings, with the community use & office area covered by the red new-build. The plans showed the staff car park between the technical block, classroom block, and sports area filled in by a new build, including partially on top of the astroturf. This red area suggested a covered atrium area as well as new rooms.

The possible plans showed a new off-road bus-bay shown in orange here. I noticed little change in size of the staff car park at the east side of the school, shown here in light blue.
